Abstract

[enter your Abstract here]

Plain Language Summary

[enter your Plain Language Summary here or delete this section]

1 Introduction

2 Methods

3 Results

3.1 Tropospheric temperature and poleward heat transport

3.2 Synoptic-scale storm characteristics

3.3 Orographic gravity waves emanating from Greenland

3.4 Greenland surface mass balance

4 Conclusions

Acknowledgments

This material is based upon work supported by the National Center for Atmospheric Research (NCAR), which is a major facility sponsored by the NSF under Cooperative Agreement 1852977. Computing and data storage resources, including the Cheyenne supercomputer (doi:10.5065/D6RX99HX), were provided by the Computational and Information Systems Laboratory (CISL) at NCAR.
